

Brand deck

How KALEOS looks, sounds, moves, and positions itself. Version 2.0, September 2026.
Source of truth: docs/brand/brand-deck.md in the repository.

Custom AI solutions for the modern business

What KALEOS is

A premium AI implementation practice. We design and ship custom AI systems for businesses that run on real operations.

What makes it different

A person at the gate. Agents draft, score, and prepare. Nothing reaches a client, an inbox, or a ledger without sign-off. One number per system, live in thirty days.

Proof we lead with

Logan Kay: AI systems across admissions and operations at Harvard Business School; Claude Corps Fellow at Anthropic. Client quotes only once confirmed. Statistics sourced and linked.

Motto: **AI that answers to you.** Footer, metadata, structured data. Not on social banners.

Who it is for, and what we refuse

FOR

Founders and executives running companies up to \$100M+ in ARR, with workflows that eat senior time and nobody in house to build.

Professional services firms, agencies, and coaching businesses, where the client relationship depends on what goes out the door.

NOT FOR

A chatbot on a website.

An AI that acts with nobody checking.

Anyone who wants invented metrics or a rate card before a conversation.

The mark

WHITE ON BLACK, ALWAYS

- The K with the pinch: two strokes meet at a point. Supplied artwork, never redrawn.
- Name written KALEOS, all capitals. Never "Kaleos HQ" in new material.
- Clear space of half the mark's height on every side. Minimum 24 px on screen.
- On the home page it is a solid: eight layers deep, swaying in 3D between minus and plus 34 degrees, never mirrored, with a supernova halo behind it. Everywhere else, flat and still.
- Never outline, skew, gradient-fill, or set it on a photo. One exception: behind the close it is filled with the nebula gradient.
- Favicon and social logo: black square, white K at 74%.

Color: black ground, white type, light as accent

void

#050507

The ground. Every background.

void-2

#0d0d11

Cards, inputs, chat panel.

star

#f7f7f4

Type, the mark, primary buttons.

mist

#9a9aa3

Secondary type.

ash

#82828b

Labels, captions.

line

rgba(255,255,255,0.12)

Hairlines.

comet

#63d9e6

Glint edge on white words, links, focus, the lit station.

nebula

#8b7cf8

Warp tails, the halo, the nebula K.

nova

#ff5fa2

Magenta. The KALEOS lines, the award, the halo, horizon lines.

ember

#ffb457

The etched edge, the Anthropic credential.

royal

#2b4cff

Selection and the final call button only.

amber

#d99a2b

Pending state only.

Where the light goes, and where it never goes

LIGHT MAY TOUCH

- The halo behind the mark
- Warp tails, the shooting star, a few tinted stars
- The horizon line between sections
- The rim above a section, the comet across one
- One glint phrase per section, edge only
- The etched edge of "AI solutions"
- The magenta halo behind the three KALEOS lines
- The award tag, the light edge on a card
- The nebula-filled K behind the close

LIGHT NEVER TOUCHES

- Body text
- Buttons, inputs, chips
- The header and footer
- Testimonial quotes
- Privacy, terms, the 404
- Backgrounds, as a fill behind text
- The mark itself, except the close

If a color is doing work as a fill, it is wrong. Light is an edge, a halo, a point.

Type: two faces, one scale

Manrope for headings

Instrument Sans carries the body, and, small and tracked, every label. Plain, direct, warm.

LABELS ARE INSTRUMENT SANS, UPPERCASE, TRACKED. NO MONOSPACE ANYWHERE.

ROLE	SIZE
Display	44 to 112 px, tracking -0.03em
H1	40 to 88 px
H2	32 to 60 px
H3	22 to 30 px
Body / lead	17 px / 20 px
Caption / label	13 px / 11.5 px uppercase

Headings are sentences in sentence case. No punctuation-split headings, no eyebrow-then-heading modules. Emphasis is weight and one glint phrase, never a new size.

The headline: white, one burn, one metal

Custom AI solutions for the modern business, in white.

"AI solutions" is laser etched: only the outer edge burns in hot after the warp and cools to a faint ember line that stays. The fill never tints.

"modern business" turns to chrome under the pointer: a studio environment mapped onto the letters, a lit bevel whose light follows the pointer, fading back to white when it leaves. Touch never sees it.

Nothing else in the headline moves.

Motion and the cosmic motif

The entrance

One second of warp: stars fly past in depth, then ease off into the field with no flash while the mark settles underneath. Plays on every full load of the home page only.

The field

The real sky: 3,000 Yale Bright Star Catalog stars around Orion, sized by brightness, tinted by color, turning slowly. One shooting star every 7 to 16 seconds. Inner pages: a sparse plain field.

On scroll

Horizons draw themselves as sections arrive. A lit rim above a section, one comet across one section per page, parallax on the stat numerals and the nebula K. All scrubbed to the scroll.

The band

The names ride a wide arc like satellites over a horizon, two lanes on phones. Never a grid, never a logo wall.

The cursor

A 6 px dot on the true pointer, a 34 px ring a beat behind that grows and turns cyan over anything pressable. Fine pointers only.

Reduced motion

Everything above turns off and shows its end state. Nothing depends on motion to be understood.

Voice: true, plain, checkable

ALWAYS

- "Premium service", "a person at the gate"
- "Talk with us" as the call to action
- "Tell us", never "tell Logan"
- Every statistic linked to a primary source, with a checked date
- Short sentences. Ordinary words. Sentence-case headings.
- The three KALEOS lines against the research carry the magenta halo, so a reader knows who is speaking.

NEVER

- Em dashes
- Dollar amounts for pricing
- Autonomous-AI claims, or any action without a person signing
- "We're still learning", "intern", "vibe coder", the founder's major
- "Revolutionary", "cutting-edge", "seamless", "unlock"
- Invented facts, metrics, quotes, or client names

Every page carries the same light

The close. Royal blue on one button, the mark filled with the nebula, one note button to the form.

Assessment and About: a sparse field behind the hero, one glint phrase, one comet, the rim above the closing section, a cyan-to-magenta edge on the form card and the portrait.

Social and assets

Banners keep the left 420 px and bottom 80 px empty, because LinkedIn lays the profile image over that corner and crops the sides on phones. Small mark, wordmark, the one line, the domain. No motto on banners.

Mark: `public/kaleos-k.png`. Social logos and banners: `docs/linkedin/`. Tokens: `src/app/globals.css`. This deck in text: `docs/brand/brand-deck.md`. Change a value in the code, change it in the markdown in the same commit, then ask for this deck to be refreshed.
